Residential Brochure

ABOUT US

- ◆ With a legacy of more than 15 years in energy, construction and telecommunication industry, our experts have spearheaded installation of several commercial, residential, and off-grid solar power systems across Australia. Target Solar an authorized solar retailer and a member of Clean Energy council has installed more than 2Mw of combined system in the commercial space with projects ranging from a small retailer to a distinguished manufacturing facility. Our goal is to eliminate energy poverty in Australia by delivering brilliant solar quality solutions and ensure everyone has access to electricity at affordable prices while providing remarkable customer service & to develop an earth conscious & eco-friendly world for the generationsto come.
- ◆ We help clients match their energy requirements and budget with the solutions that are specially designed to offer maximum benefits. Our considerable buyingpower helps us select premium components while maintaining excellent value for money.
- ◆ Target Solar has some of Australia's most skilled technical minds including talentedmechanical and electrical engineers, accredited installers, electricians and project management staff. You will have a single point of contact who will make sure that you get safe and timely service without any surprises.
- ◆ We at Target Solar provide ongoing after sales support to make sure that you get optimum benefits from your investment. We offer you a minimum 5 years warranty on products and installations regardless of the size of the project, easy monitoring of power outputs, complimentary investigations of remote faults and constant cleaning with electrical inspections.

- ◆ **What differentiates Target Solar with other companies?**

While there are more than 5,000 accredited solar installers by Clean Energy Council, there are only about 300 Clean Energy Council Approved Solar Retailers across the entire continent and Target Solar is proud to be one of the approved solar retailers. The reason why there are so few approved retailers is because of the extremely high code of conduct standards set by Clean Energy Council and very few companies are willing to stick to it.

- ◆ **What does this mean for you?**

When you buy solar from a Clean Energy Council Approved Solar Retailer, you can be assured that you are buying a quality product from a company that follows all relevant consumer protection lawsand is prepared to back the operation of your solar system for atleast five years.

WHAT DO WE OFFER

Quality Focus

We are extremely quality focused company hence we only use Tier-1 panels, premium inverters & approved electrical accessories

Engineering Focused Solutions

We provide tailor made solutions for each client, suitable for their usage and requirements.

Single Point-of-Contact

With Target Solar, you will have a single point of contact throughout the installation & post installation phase.

Project Supervision

We identify all the project requirements and make sure everything is completed on time and on budget by consistently providing reminders, phone calls, installation checklists and all the necessary assistance.

Logistics Management

With detailed operation and contingency planning, we guarantee logistics for your project run as smoothly as possible.

Accredited and Skilled Installers

We only use CEC certified installers to make sure your installation is done as per standards set by Clean Energy Council, Australia.

In-house Engineers and Technicians

With a team of highly skilled engineers and technicians we aim to insure client gets customised quality products and services.

Top-notch Customer Service

Our friendly sales consultants will be just a push of a button away if you need to get in touch with us before, during or after your installation.

Proper Documentation

We provide systematic documentation of award-winning manuals. These manuals eliminate problems that are often overlooked in a large-scale solar project.

Subcontractor Management

Depending on your project requirements, you may need to contact subcontractors like builders and plumbers. We contact & manage all these subcontractors on your behalf which aids in completion of project on time.

Queensland

System Size : 6.6 kW

Location : QLD

Install Date : 23-07-2019

Panels : Risen Energy 275p

Inverters : Sungrow SH5K

Queensland

System Size : 6.55 kW
Location : QLD
Install Date : 25-07-2019
Panels : Canadian 280Wp
Inverters : Sungrow SH5K

Queensland

System Size	:	6.615 kW
Location	:	QLD
Install Date	:	22-07-2019
Panels	:	Canadian 315MS
Inverters	:	Huawei, SUN2000L-5KTL

Queensland

- System Size** : 6.6 kW
- Location** : QLD
